

NAV Anywhere

Mobility solutions for Microsoft Dynamics NAV

NAV Anywhere is a set of mobile solutions that are completely integrated with Dynamics NAV. These mobile solutions offer you access to your Dynamics NAV system anywhere, anytime and from almost any mobile device. It's your business in the palm of your hands!

NAV Anywhere Logistics

This application supports all processes in your warehouses, like goods receipts, item transfer, inventory counting, sales order picking and many more.

NAV Anywhere Sales

NAV Anywhere Sales enables your sales force to enter orders and view customer and item information while they are on the road.

NAV Anywhere Services

This mobile solution offers your service workers the ability to view open service worksheets and other service order information. It also allows them to register used materials, hours spent, and to allocate costs.

And many more.....

Our framework, a truly unique solution!

→ Integration

Because the NAV Anywhere framework is built entirely inside Dynamics NAV, it is simply an extra option in the main menu of NAV. This provides easy access to a powerful tool that allows you to quickly modify existing solutions or create your own custom solutions.

→ Flexibility

NAV Anywhere is entirely hardware-independent so it runs on nearly any device capable of accessing a modern web browser.

→ Easy to Maintain

NAV Anywhere is based on familiar Microsoft products only and does not use any third-party middleware. This makes implementation and support easy because you do not add additional technology layers.

NAV Anywhere

The smartest mobile framework for Dynamics NAV

Any device with a modern web browser

- Support of various screen formats
- Style Sheets support for great looking apps
- Support for barcode scanning

Microsoft IIS

- Generic web service and mobile portal
- Translates XML messages into HTML screens
- Ensures optimal performance

Microsoft Dynamics

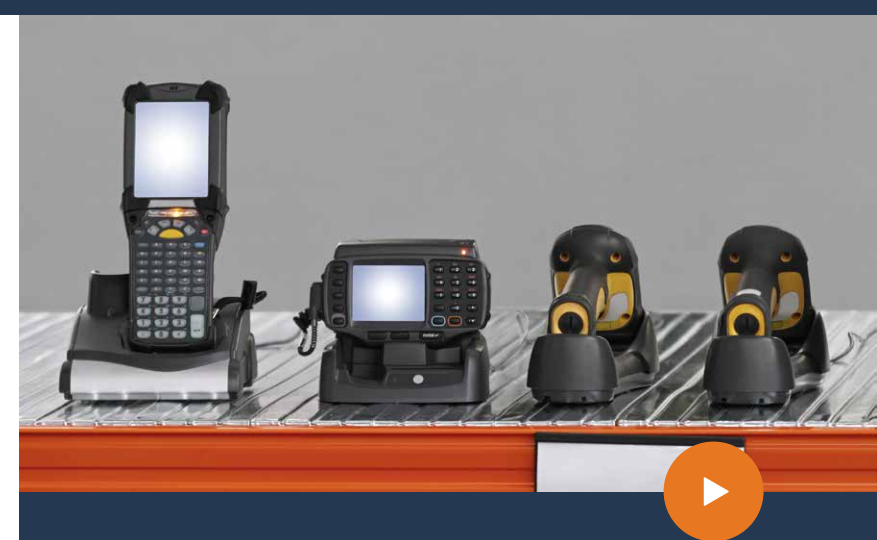

- Screen definitions
- Workflow | business logic

There's an app for that

It's hard to imagine a mobile application that cannot be created with the NAV Anywhere Framework. But in some cases, you still might prefer a native app to mobilize your processes.

Good news! To-Increase can develop custom mobile apps for Windows, Android or iOS that are fully integrated with NAV and meet your specific requirements.

TIP! Take a look and try out our demo Sales iOS app for AX in the Apple App store for free! Just search for AX Anywhere and switch to demo-mode.

→ Development

Define screens and workflows.

→ Management

Define mobile users, roles, rights, and languages.

→ Operations

Monitor mobile users and log all transactions.
